

# EMPLOYMENT SUPPORTS

## FOR AUTISTIC INDIVIDUALS

Tailored support to explore and navigate pathways to prepare for, and locate, meaningful and inclusive employment. Supports are delivered by our neurodivergent, lived-experience experts.

**NEURO-WORKS**

meeting in the middle.

# WHAT WE DO

We support neurodivergent individuals and employers to work together as they realise the unique strengths that come with neurodivergence (different ways of thinking) and the importance of an inclusive workplace. We specialise in Autism and ADHD. We support *both* parties to optimise communication, tasks and environments.

## WAYS TO ACCESS

### NDIS Participants

Talk to your Support Coordinator or Local Area Coordinator.  
Discuss your employment goals and eligibility for unlocking "Finding and Keeping a Job" funding.

### Individuals with a Job Provider (Through Centrelink)

Discuss eligibility for funding for specific training and support around neurodivergence in the workplace (e.g. awareness training).

### Individuals with no support

You are welcome to privately fund our services.  
We can offer a free 10 minute call to provide general advice about how to connect with services.

# INDIVIDUAL SUPPORTS

Tailored support to navigate employment options; whether that be in the open market, self-employment or volunteering. We walk beside neurodivergent individuals as they develop skills, explore strengths and discover possibilities.

## HELP WITH:

We work with neurodivergent individuals (school leavers through to mature adults) who have an employment related goal. Areas of focus that could be included in individualised support plans include (but are not limited to):

**Goal setting & career planning**

**Identifying strengths & areas of difficulty**

**Conflict management**

**Reasonable accommodations**

**Workplace and task optimisation**

**Work experience**

**Self-confidence**

**Protecting health & wellbeing**

**On-the-job mentoring**

Support plans are individually tailored and regularly reviewed and revised to maintain relevance and suitability.

### Benefits

Flourish within a framework of safety and belonging where skills are optimised, strengths are recognised, and opportunities are within reach. Allow health and wellbeing blossom and instances of falling out of work decrease.
